Linear Strip

Key Considerations

Power Supply

Always check the total wattage and current is well within the driver parameters, if in doubt increase driver size. Allow for a minimum of 20% headroom. E.g. if you have 19W of LED Strip, use a 40W driver, not a 20W.

Voltage Drop

Always verify the maximum continuous run length to avoid voltage drop or overheating. Limit each run to the specified maximum recommended length.

Use multiple power supplies and/or power feeds with invisible joins to achieve “longer than maximum” runs. E.g. for a 15m run of 10W tape. Use 3x 5m lengths with 3x power feeds. Install the 3x 5m lengths so they appear as one continuous length.

Use appropriate gauge feed cables for minimal resistance in connections.

Opt for 48V long distance strip for installations with limited power feed options and long run requirements (10m+).

Environment

Always check IP rating suitability for the installation environment. If installing outdoors, use IP67+ strip and terminate connections with waterproof IP68 joins.

Installation

For a professional finish and better heat dissipation, mount the linear strip in aluminium extrusion profiles with diffusers. Ensure the extrusion surface is clean, dry, and smooth for proper adhesion.

Linear LED Strip is fragile. Bending or shaping beyond format supplied is to be avoided at all times. Do not touch the diodes or put excess pressure on the diodes when installing, especially for IP20 products.

Do not bend regular tape around 90 degree corners. It will damage tape and cause early failure. Use pre-made corner connectors or flexible joins for angled turns.

Install tape in segments with flexible joins if the area is highly irregular. Or, use side bend Neon style tape.

Compatible Profile Examples

LT20 IP67 Linear Strip is most commonly used with the following profiles. See Aluminium Profile specification sheets for the complete range.

Note: IP67 tape does not fit inside Standard Mini or Ultra Shallow Mini profile.

XS2311 Medium Standard Shallow

XS2222 Corner Mount

XS3535 Large Standard

Installation Warning:
LT20 single colour must be used with aluminium profile. Installation directly to wood or GIB will cause early failure.

Compatible Controllers

Pair Linear Strip with wireless control accessories such as Casambi or Basic RF for increased functionality and control.

Mounting	Supplied with 3M Adhesive backing
Lifespan	50,000hrs (L70)
Beam Angle	120°
IP Rating	IP20, IP67
Function	Tunable white tape blends 2700K and 6500K diodes to create colour temperatures. E.g. 4500K would be 100% 2700K and 6500K diodes combined, hence higher wattage & lumen output. 2700K would be just the 2700K diodes hence the lower wattage and lumen output.
Driver	Sold separately, specify according to wattage/current x length
Application	Interior or Exterior
Warranty	5 Year Warranty

Available In

Compatible Profile Examples

LT5 Fixed Colour Linear Strip is most commonly used with the following profiles. See Aluminium Profile specification sheets for the complete range.

XS1613 Mini Standard

XR2513 Mini Standard

XS2311 Medium Standard Shallow

XS2222 Corner Mount

Compatible Controllers

Pair Linear Strip with wireless control accessories such as Casambi or Basic RF for increased functionality and control.

XR2508

Ultra Shallow

XR2508 Ultra Shallow is designed for recessed installation into materials with limited depth.

Available In

Description	Code
XR2508 - Ultra Shallow	
Custom Length: Silver Ultra Shallow Recessed with opal frosted diffuser. (Supplied with 1x blank and 1x feed end cap as standard. If extra end caps are needed, specify when ordering.) (m)	XR2508 S
2.5m Kit: Silver Ultra Shallow Recessed with opal frosted diffuser. (Supplied with 2x blank and 2x feed end caps.) (ea)	XR2508 SK

Accessories

Description	Code
Silver End Cap Blank	XR2508 ECBS
Silver End Cap Feed	XR2508 ECFS

XR2508 extrusion comes complete with plastic end caps and an opal frosted diffuser.

Silver

Dimensions

XR2513

Mini Standard

XR2513 Mini Standard is designed for a wide range of recessed installation types. The 13mm depth and opal frosted diffuser creates perfect dot free linear light when using Halcyon HD 5W, 10W, 15W & 20W tape. Perfect for use in hidden or direct line of sight applications the XR2513 comes complete with smooth aluminium end caps to block all internal light for a truly professional installation.

CRI	90+ (R9 <66)
Lifespan	60,000hrs (L90)
UGR	Suitable for installations requiring UGR of less than 19.
Beam Angle	80°
Binning	SDCM 3
Finish	Black or White (Powder Coated)
Material	Aluminium, PMMA
IP Rating	IP20
IK Rating	IK02
Application	Interior
Driver	Incorporated
Dimming/Control	Non-dimmable. (Dali available on indent.)
Complete With	Pre-wired with 1700mm feed cable
Warranty	5 Year warranty
